
Course Outline for ISO 14000:2004 Training

This is the ideal training course for ISO 14000 and Environmental Management Systems (EMS).

The course covers thoroughly ISO 14000:2004 and provides training on how to establish and maintain an EMS, it should be taken by all relevant Managers and Staff of any organization committed to controlling its environmental impact and liability exposure, enhancing its image and market share, and achieving regulatory compliance.

- It can be taken from anyone's workplace or from home through the Internet.
- It has "save and exit" features so that you can do it at your own pace (a couple of sections per day...).
- The cost is 50 % less expensive on the average than similar class training offering.
- It uses examples and quizzes that give very good exposure on industry related environmental implementation issues.
- It provides excerpts of the International Standard ANSI/ISO 14001-2004 (in dark blue) and the guidance of ANSI/ISO 14001-2004 (in dark green). It also uses information from ANSI/ISO 14004-2004 to give guidance in implementation of environmental management systems. Both standards are reprinted with permission of the American Society for Quality.
- It uses a continuous evaluation method with on-going quizzes to facilitate the information retention.
- If your final average in the ongoing evaluation is equal or greater to 70% you will be issued a **training certificate** that you can print for 8 hours of ISO 14000:2004 Training.

The structure of the class is as follows:

- Quality Management Systems overview.
- Scope and ISO 14000 Standards.
- Definitions.
- Environmental Management System (EMS) Principles.
- Environmental Management System Requirements.
- Final Exam for score of less than 70%.

Worldwide Course Recognition:

CALISO online training courses are recognized by all registrars and hiring companies as objective evidence of effective training on the particular standard and regulation. Since 1999, they have been the most popular and most widely used training courses in English, with over 15,000 trainees in the US and worldwide. The standards and regulations are provided online under licensing of the American National Standard Institute (ANSI), SAE International, or courtesy of the Federal Drug Administration (FDA).

Course requirements

- The training is optimized for Microsoft Internet explore 5.0 or higher and Netscape 4.5 or higher

Certificate requirements

The course uses a continuous evaluation method with on-going quizzes to facilitate the information retention. If your final average is equal or greater to 70% you will be issued a **training certificate**. If your final average evaluation is less than 70%, you will have to take a final exam and score above 70% to be issued the training certificate.
